Graduated in Multimedia Design by the Senac Arts and Communications University in 2005. Working with graphic design, web design and video since the year 2000, when I got sure that that was what I wanted for my future. Since then, I've been dedicating myself to learn and improve both my technical skills and my knowledge in the area.

I consider design not only a profession, but a passion, and I try to take all I can from every single job. With the curiosity allied to the research, I keep myself informed over the market happenings not only in Brazil, but also in the whole world. This way I keep my portfolio constantly updated, where I share my last jobs.
